

**Keep your curiosity.**

A warm workspace for videos worth keeping.  
Watch. Save. Transcribe.

Identity proposal for Thomas Rynell / [picker.rynell.org](https://picker.rynell.org)

# The idea: curiosity, kept.

Picker turns a video collection into a place to return to.  
The identity balances a distinctive publishing voice with  
the clarity of an everyday working tool.

Name: Picker. Use Material Picker only where continuity is needed.

Promise: Keep your curiosity.

Descriptor: Your video learning workspace.

Functional line: Watch. Save. Transcribe.

Warm, direct, thoughtful. Never academic or overly technical.

Use plain verbs: Add video, Download, Open transcript, Export text.

Avoid claims about privacy, speed or AI accuracy unless verified.

# One mark. Many contexts.

The upright P carries a play triangle in its negative space.

All logo lettering is outlined: no font installation is required.

Dark surfaces: orange mark + parchment wordmark.

Light surfaces: rust mark + espresso wordmark.

Monochrome: use the supplied single-color masters.

Clear space: at least 25% of the mark height on every side.

Minimum: full lockup 112 px wide; standalone mark 16 px.

Never stretch, add shadows, rotate, fill the triangle or recolor letters.

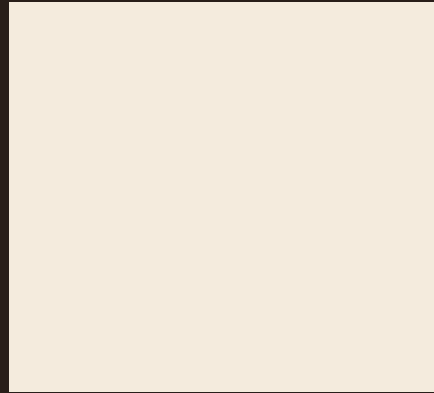

Use the app icon for compact navigation and browser tabs.

# Warmth, with a spark.

Espresso

#281E19

Roast

#382B24

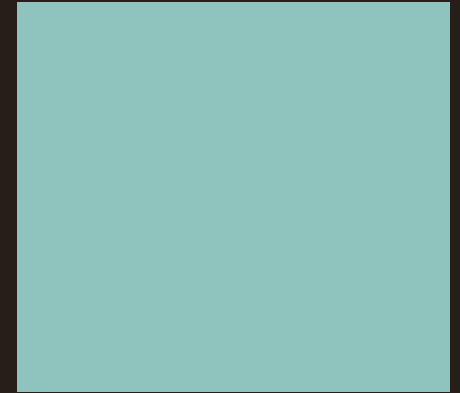

Parchment

#F4EBDD

Orange

#FF7A3D

Teal

#8FC4BE

Brown gives the interface its calm foundation. Parchment carries text.

Orange marks the primary action. Teal marks transcript emphasis.

Keep orange sparse: one dominant action per working area.

Light mode uses rust #A43C17 and deep teal #225E58 for readable accents.

Measured contrast ratios / sRGB

Parchment / espresso 13.78:1 | Espresso / orange 6.28:1

**Clear type. Useful words.**

**Ideas worth returning to.**

Watch. Save. Transcribe.

Logo: outlined Nimbus Sans Bold lettering; supplied as vector paths.

Interface: system-ui for familiar, crisp rendering and fast loading.

Headlines: 32/38 px desktop; 28/34 px mobile. Weight 650-700.

Body: 16/24 px. Metadata: 13/19 px. Avoid tiny all-caps labels.

Use tabular figures for time, file sizes and download progress.

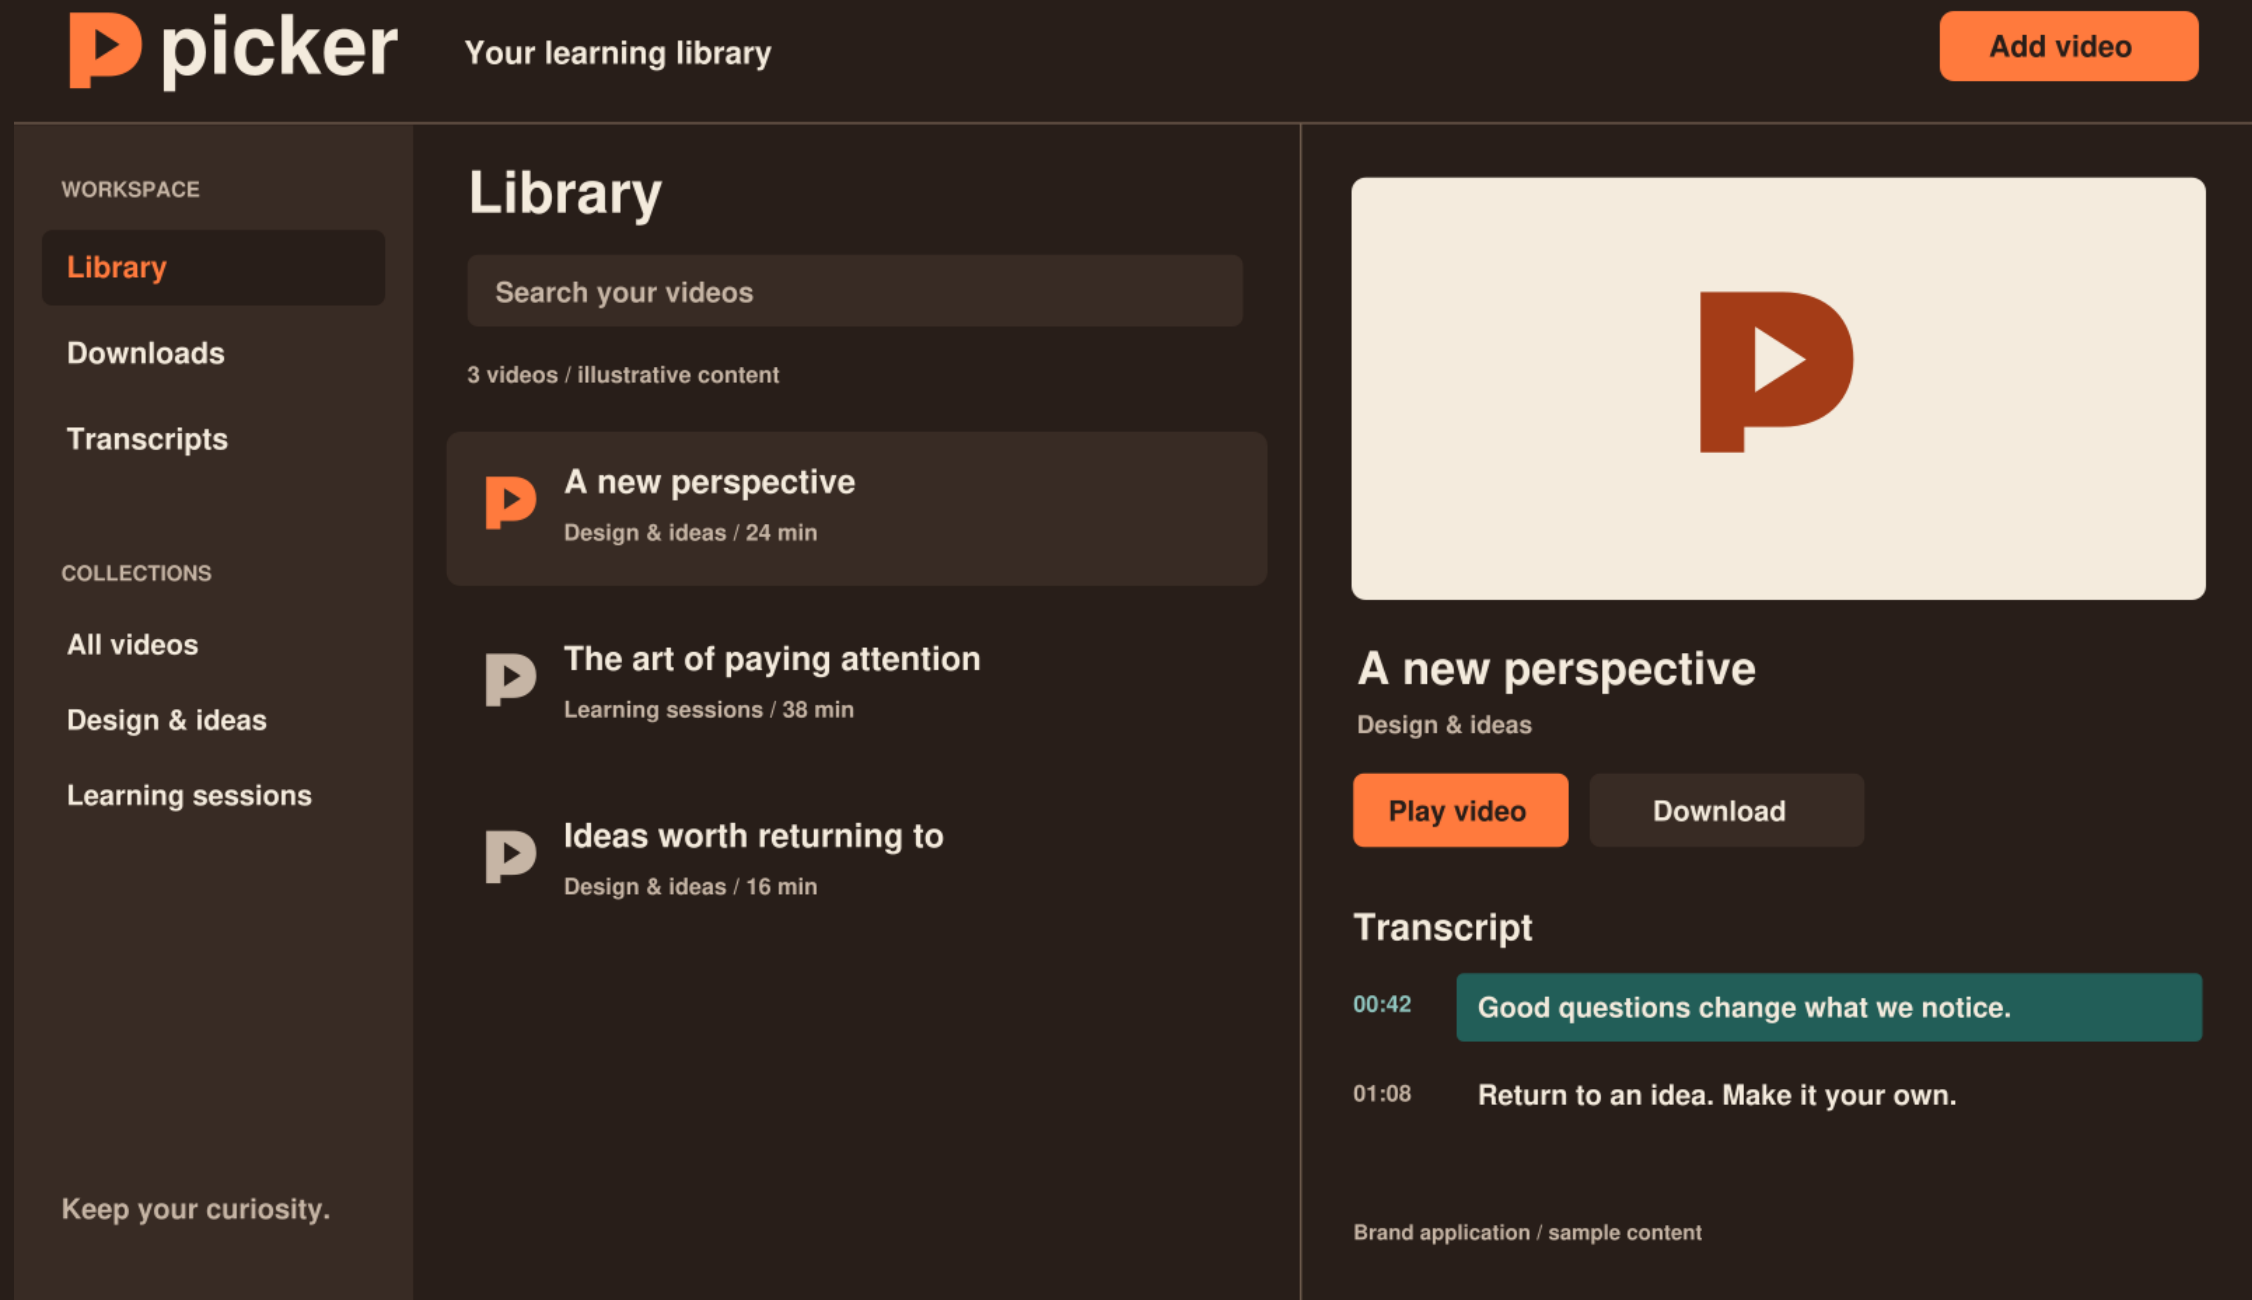

Empty library: Add your first video.

Download complete: Saved for offline viewing.

Download error: Download interrupted. Try again.

Transcript empty: Create a transcript to follow along in text.

# The identity at work.

Illustrative layout and sample content. Not a deployed or functional app.

# A system that travels.

Good questions change  
what we notice.

Illustrative mobile application

 picker

# Keep your curiosity.

Watch. Save. Transcribe.

Desktop: keep folders, library and player legible.

Mobile: show one primary task at a time.

Put metadata editing behind a dedicated view.

Keep status words beside colors and icons.

Use a visible focus ring and 44 px touch targets.

# Ready for implementation.

logos/ - SVG masters and transparent PNG lockups

icons/ - favicon, ICO, app icons and web manifest

social/ - 1200 x 630 sharing image and 1080 x 1080 post

brand/ - exact brand board and desktop/mobile applications

implementation/ - CSS, JSON tokens, contrast checks and head tags

1. Copy assets into the existing app; retain its working functionality.
2. Replace the header logo and favicons. Apply scoped color tokens.
3. Style navigation, playback, downloads and transcript states.
4. Test keyboard use, focus, zoom, mobile layout and real long titles.
5. Verify all asset URLs, download status labels and transcript behavior.

This package defines the proposed identity; the live site was not changed.

SVG masters are the production reference. The generated visual board is a concept.

Source lettering uses Nimbus Sans; fonts are not redistributed in this package.
